Subsequently, the shares have been allotted to the shareholders on 5 June 2023. Consequently, the number of shares increased to 19,274,318.

23.1.2 The weighted average number of ordinary shares outstanding during the year is the number of ordinary shares outstanding at the beginning of the year, adjusted by the number of ordinary shares issued during the period multiplied by a time weighting factor. The time-weighting factor is the number of days that the shares are outstanding as a proportion of the total number of days in the year. The weighted average number of shares is calculated by assuming that the shares have always been in issue. This means that they have been issued at the start of the year presented as the comparative figures.

23.1.3 No diluted EPS is required to be calculated for the year as there was no scope for dilution during the year.

25 Explanations for significant deviations:

- 25.1** EPS has decreased in line with decrease in revenue, lower one-off benefit coming out of reassessment of past liabilities & obligations and reimposition of technology & trademark royalty charge by the parent company from Q3'24 onwards. The magnitude of the fall in EPS was mitigated to some extent through efficiency in operating expenses and increase in net finance income.
- 25.2** Decrease in NOCFPS is due to decrease in operating profit and reduced tenure of UPAS LCs.
- 25.3** There is very minor movement in Net Asset Value (NAV) per share compared to the NAV of 31-Dec-23.
