Subsequently, the shares have been allotted to the shareholders on 5 June 2023. Consequently, the number of shares increased to 19,274,318.

23.1.2 The weighted average number of ordinary shares outstanding during the year is the number of ordinary shares outstanding at the beginning of the year, adjusted by the number of ordinary shares issued during the period multiplied by a time weighting factor. The time-weighting factor is the number of days that the shares are outstanding as a proportion of the total number of days in the year. The weighted average number of shares is calculated by assuming that the shares have always been in issue. This means that they have been issued at the start of the year presented as the comparative figures.

23.1.3 No diluted EPS is required to be calculated for the year as there was no scope for dilution during the year.

25 Explanations for significant deviations:

- 25.1** Despite decrease in revenue and lower one-off benefit coming out of reassessment of past liabilities and obligations, EPS has improved due to efficiency in operating expenses, increase in net finance income and one-off waiver of technology & trademark royalty granted by the parent company.
- 25.2** Increase in NOCFPS resulted from optimization of production costs and operating expenses.
- 25.3** NAV decreased due to decreased cash and cash equivalents mostly resulting from dividend payment.
